Supplier name: Firstpoint Healthcare Ltd

Publication date: 23 September 2022

### Commitment to achieving Net Zero

Firstpoint Healthcare is committed to achieving Net Zero emissions by 2050.

### Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

2024	11	36%
2025	9	47%
2026	7	59%

We project that carbon emissions will decrease over the next five years to **7 tCO<sub>2</sub>e** by **2026**. This is a reduction of **59%**

## **Carbon Reduction Projects**

### Completed Carbon Reduction Initiatives

In the future we hope to implement measures such as:

- Adopting LED/PIR lighting controls
- Training and in house meetings to be conducted over zoom where possible to reduce the amount of travel
- Employees encouraged to use public transport when travelling for business purposes
- Electrification of company cars
- Electricity supply is determined by the landlord so an annual review from the landlord will be requested to ensure where possible that they are using an appropriate electricity supplier
- Continue to reduce the amount of paper used in the office – currently all timesheets and invoices are electronic which has seen a dramatic decrease in the amount of paper being used
- Continue to work towards a paperless office
